

16 March 2011

To whom it may concern:

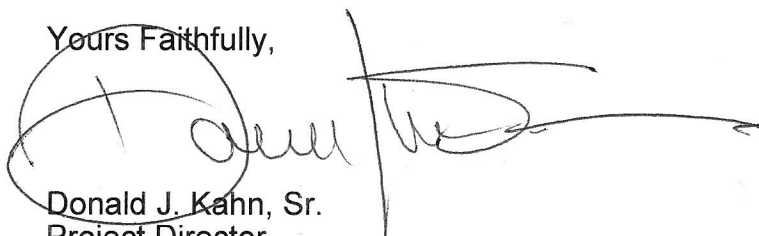

This letter is written to express appreciation to Famous Electrical Equipment Repairing, one of the most cooperative, efficient and hard working sub-contractors for Johnson Controls International LLC (York International). Since 2004, Famous has been promptly and efficiently providing their services in the following areas of expertise:

- Installation, assembly and repair of HVAC air-side products such as recirculating air handling units, fresh air handling units, fan coil units, heat recovery wheels and heat pipes in accordance with approved certified drawings.
- Troubleshooting site problems such as water carry-overs, over-current, changing pulleys, drain pipe height sizing, gaskets, repairing leaks, changing springs under fan and motor assemblies with suitable sizes, changing handing connections, reducing the heights of penta-posts to accommodate available space, etc.
- Rewinding different sizes of motors ranging from 0.25 kw to 50 kw using proper tools and expertise to meet original requirements.
- Fabrication and on-site installation of hail guards for air cooled chillers, etc.
- Rust removal and repainting of the insides and outsides of installed air handling units.
- Site supervision and installation trouble-shooting for air handling units and fan coil units, both chilled water and DX type.
- Installation of ultra-violet, anti-bacterial lights inside AHUs and FCUs.

This letter is issued to Famous in appreciation of their expert work and cooperation.

For any clarification on the above, please do not hesitate to call the undersigned.

Yours Faithfully,

Donald J. Kahn, Sr.
Project Director
Johnson Controls International
